DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, 15-20, 27-32, and 36 drawn to a method for assigning private Internet Protocol address to network device in a cluster, classified in class 370, subclass 466.
 - II. Claims 5-14, 21-26, 33-35, and 37 drawn to a method for automatically correcting Internet Protocol address conflicts among network devices, classified in class 709, subclass 245.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as correcting Internet Protocol address conflicts among network devices. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
